PROFILE

Holder of a Bachelor's degree in Telecommunications, I have 8 years of experience in the IT field, including 4 years focused on frontend development as an R&D engineer.

Reliable, committed, and honest, I invest myself fully in projects and know how to support the team effectively.

I create value for the company by combining user-centric thinking, technical rigor, and genuine human engagement.

I design intuitive, aesthetic, and seamless interfaces, drawing on a deep understanding of business needs and user feedback, with a strong passion for innovation and continuous improvement.

My listening skills, curiosity, and team spirit enable me to collaborate effectively with all stakeholders. I also care deeply about fostering team cohesion and cultivating a positive and motivating work environment.

PROFESSIONAL EXPERIENCE

AUG 2020 -
DEC. 2024

R&D ENGINEER

ASYRIL SA

As a frontend developer within the R&D team, I was involved in the development of new features for EYE+ products, working closely with end users and cross-functional teams.

Key actions:

- Led the early UX design phases for new products and features: cross-disciplinary workshops (ideation, Figma mockups, user testing, UX iterations)
- Designed and developed frontend interfaces using Vue.js, Vuetify, and TypeScript
- Integrated the frontend with a Python backend via gRPC
- Actively participated in SCRUM ceremonies, version control with Git, and collaborative development processes

Results:

- Delivered intuitive interfaces aligned with user needs, thanks to direct user involvement throughout the design and development cycles
- Improved development workflow through enhanced communication between PMs, POs, Scrum Master, and the dev team, fostering team spirit and coordination

OCT 2010 -
APR 2025

SUPERVISION & COORDINATION - SKI SCHOOLS

ZERMATT, CRANS-MONTANA, SAAS-FEE, LA BERRA, CAVIAHUE (ARG)

In various ski schools, I held leadership roles combining operational management, instructor training, and digital communication strategy.

Key actions:

- School management: supervised daily operations, handled scheduling, client relations, and coordinated teams (up to 125 instructors)
- Head Coach: designed and implemented internal training programs, supporting instructors in developing pedagogical and technical skills

Professional experience (continued on next page)

- On-snow coaching: provided ski instruction from beginner to advanced levels, including high-end international clientele
- Digital marketing: created a new website, improved the online booking process, and managed social media presence

Results:

- Strengthened online and social media visibility of the schools
- Improved teaching quality through a structured and continuous training program
- Optimized internal operations, making instructors' work easier and enhancing the overall client experience

EDUCATION

SEPT 2017 -
AUG 2020

BACHELOR OF SCIENCE IN TELECOMMUNICATIONS SPECIALIZATION IN INTERNET AND COMMUNICATIONS

HEIA-FR – SCHOOL OF ENGINEERING AND ARCHITECTURE, FRIBOURG
